

Maksim Gvazava

iOS Developer

Tula, Russia | remote / hybrid | open to relocation | available immediately
+7 (999) 782-26-55 | maximgv@icloud.com | t.me/maximgv3 | github.com/maximgv3

Key Skills

- Swift
- SwiftUI
- UIKit
- MVVM/MVP
- Swift Concurrency
- Combine
- URLSession
- REST API
- Core Data
- OAuth/WebKit
- Swift Testing
- Unit/UI tests
- AVFoundation
- Git
- SPM

Education

Yandex Practicum
Advanced iOS Developer, 2026

Languages

Russian - native
English - B1

Work Format

Full-time / internship
Remote or hybrid
Open to relocation
Available immediately

iOS developer experienced in building SwiftUI and UIKit applications. Completed the Yandex Practicum Advanced iOS Developer program and worked both independently and in a team using pull requests and code review. My main project is a WMS app grounded in real warehouse workflows.

Selected Projects

WMS - warehouse operations app

SwiftUI, MVVM, Observation (@Observable), Swift Concurrency, AVFoundation, Charts, PDFKit, Swift Testing
Built a WMS app based on real warehouse workflows. Implemented order picking with barcode scanning, missing and replacement item handling, and an employee profile with finance history, interactive rating charts, tariff filters, and PDF documents. Added mock services, API-style data handling, loading/error states, and tests for core logic.

ImageFeed - networked image feed

UIKit, MVP, OAuth 2.0, WebKit, URLSession, Kingfisher, XCTest
Implemented OAuth through WebView, a paginated feed with likes, profile, full-screen viewer, logout flow, and network error handling. Covered key flows with unit and UI tests.

FakeNFT - team project from a specification

SwiftUI, MVVM, async/await, URLSession
Implemented the Profile epic: profile screen, data editing, and navigation. Worked in a team Git workflow with branches, pull requests, and code review.

Other Projects

Trains - SwiftUI, Combine, async/await; route search, filters, loading and errors.
Tracker - UIKit, Core Data; trackers, categories, and NSFetchedResultsController.
MovieQuiz - UIKit, MVP, URLSession, unit/UI testing.

Practical Experience

Wildberries & Russ - Warehouse Operations Associate

August 2023 - present
Order picking, product placement, inventory, handheld scanners, and digital warehouse systems. I use real operational constraints, common errors, and user workflows as domain knowledge for the WMS project.
